SICAF CELEBRATES ITS 50TH ANNIVERSARY AND INVESTS IN THE EXPANSION OF ITS HEADQUARTERS AND INDUSTRIAL CAPACITIES

SICAF, an expert in the development and manufacturing of cosmetic products and a company of ANJAC Health & Beauty, a French industrial group and one of the international leaders in formulation, manufacturing and packaging of products, is celebrating its 50th anniversary. On this occasion, SICAF is inaugurating the extension of its headquarters in Valréas with the opening of a new building and is highlighting the modernization of its industrial site, which is expected to be accompanied in the future by new recruitments across all its areas of expertise.

A strengthened site and new industrial equipment to support Made in France growth

With 50 years of expertise, SICAF develops and manufactures products for leading beauty and cosmetics brands. An expert in skincare, the company also benefits from recognized know-how in sun care, fragranced derivatives and haircare. It further stands out through its proprietary and differentiating technological expertise (hot pouring, BIODIS+, Airflow, ExTempo, etc.), as well as a highly advanced Research & Innovation team working to enhance the sensory performance, formulation and efficacy of the products developed for brands.

In 2025, **SICAF invested more than €3 million to strengthen its industrial capacities** and support its growth momentum. This strategy resulted in the expansion of its headquarters in Valréas with **the construction of a new 1,200 sqm building**, now serving as the company's nerve center.

The packaging workshop has also been fully redesigned and modernized, complemented by new industrial investments, including **the installation of a new hot-pouring line**, enabling the manufacture of products such as deodorant sticks, sun care sticks and facial care sticks. These developments result in a **125% increase in industrial capacity**, a broader diversity of formats and references offered to brands, as well as enhanced responsiveness to meet market demands.

An engine of industrial jobs in valréas

Driven by its growth momentum, SICAF is strengthening its teams and actively contributing to the economic development of the region, upholding Made in France industrial expertise. The cosmetics sector, a globally recognized field of excellence and a key driver of exports for France, also represents a major economic pillar for the region, to which SICAF makes a full contribution.

The company plans to continue this momentum with new recruitments across all its areas of expertise — R&D, production, quality, logistics, technical operations, and project management — ranging from operational staff positions to managerial roles.

“The inauguration of this new site marks a major milestone in SICAF’s history. It reflects our growth momentum and our commitment to sustainably invest in our industrial capacities and our talent. Behind many skincare, sun care, and haircare products lies the expertise and dedication of our teams. Our products are part of the daily lives of millions of consumers: in their bathrooms, on their shelves, in their beauty routines. It is this contribution to the French industrial landscape that has made our teams proud for the past 50 years,” says **Nathalie GOURJON, Chief Executive Officer, SICAF.**

About ANJAC Health & Beauty Group

The French industrial group ANJAC Health & Beauty is a partner to pharmaceutical laboratories and cosmetics and wellness brands. It designs, develops and manufactures, from raw materials to finished products. It brings together 16 expert and complementary companies as well as 22 R&D and production sites in the health, beauty and food supplements sectors: Aircos-Pascual, Apollo, APR Beauty, Chemineau, Cosmetix West, Eurowipes, Feltor, Innovi, LPEV, Pharmaline, Roval, Shadeline, Sicaf and Stephid. Founded in 2008, the Group today has more than 3,100 employees and achieved sales of nearly 800 million euros in 2025.
